Get alert when employee use removable disk or do other sensitive action on the computer.
(Professional edition only)

Audit enterprise computer hardware and software assets.

Take full remote control of all computers in the network, send file, instant messgae to remote user.

Benefits:

IMonitor EAM Employee Monitoring Software offers numerous benefits, most of which you will recognize as soon as you install the product.

The most significant benefit is the cost savings to your company. Your Return On Investment (ROI) will be realized almost immediately as a result of increased productivity coupled with the low cost of ownership.

Besides saving your company money, IMonitor EAM has many other attributes that will directly benefit your IT staff and the Managers who actually use the tool.

Technical Benefits:

Complete Internet & PC Monitoring

Every facet of PC usage is monitored and recorded at the workstation level providing you with valuable information about how your office PCs are being used.

Centralized Management

All collected PC activity logs are transferred to a centralized depository (called the Data Vault) allowing for quick access, backup and review by the IMonitor EAM Dashboard application.

Scalable Architecture

The flexible architecture of IMonitor EAM allows your monitoring and surveillance capabilities to expand as your company grows.

Rapid Deployment

Remote deployment tools make installation, configuration and ongoing data collection easy.

Data Security & Integrity

With multi-level user accounts, optional file encryption for Email Attachments and Snapshot files, and a centralized database, IMonitor EAM offers multiple layers of security for your recorded data.

Transparent

The client recorder installs in seconds and operates in "stealth mode" so your employees are unaware that they are being monitored.

Flexible

Assign roles to those using IMonitor EAM to restrict their views when monitoring certain employees or departments. For example, you can restrict the view of a front line manager so he sees only the data collected from the employees in his department.

No Performance Impact

The additional overhead incurred to monitor your employees is marginal and will not impact your network or the computers being monitored.

End User Benefits:

Intuitive & Easy to Use

The IMonitor EAM Dashboard, with its feature rich User Interface and built-in Wizards, offers both a "High Level View" and "Detailed View" of how your employees use the Internet and Computer Resources.

Feature Depth

IMonitor EAM provides you with numerous tools and capabilities, making it the most powerful Employee Monitoring package on the market.

Customizable

You can create customized charts and reports to address the specific needs of your organization.
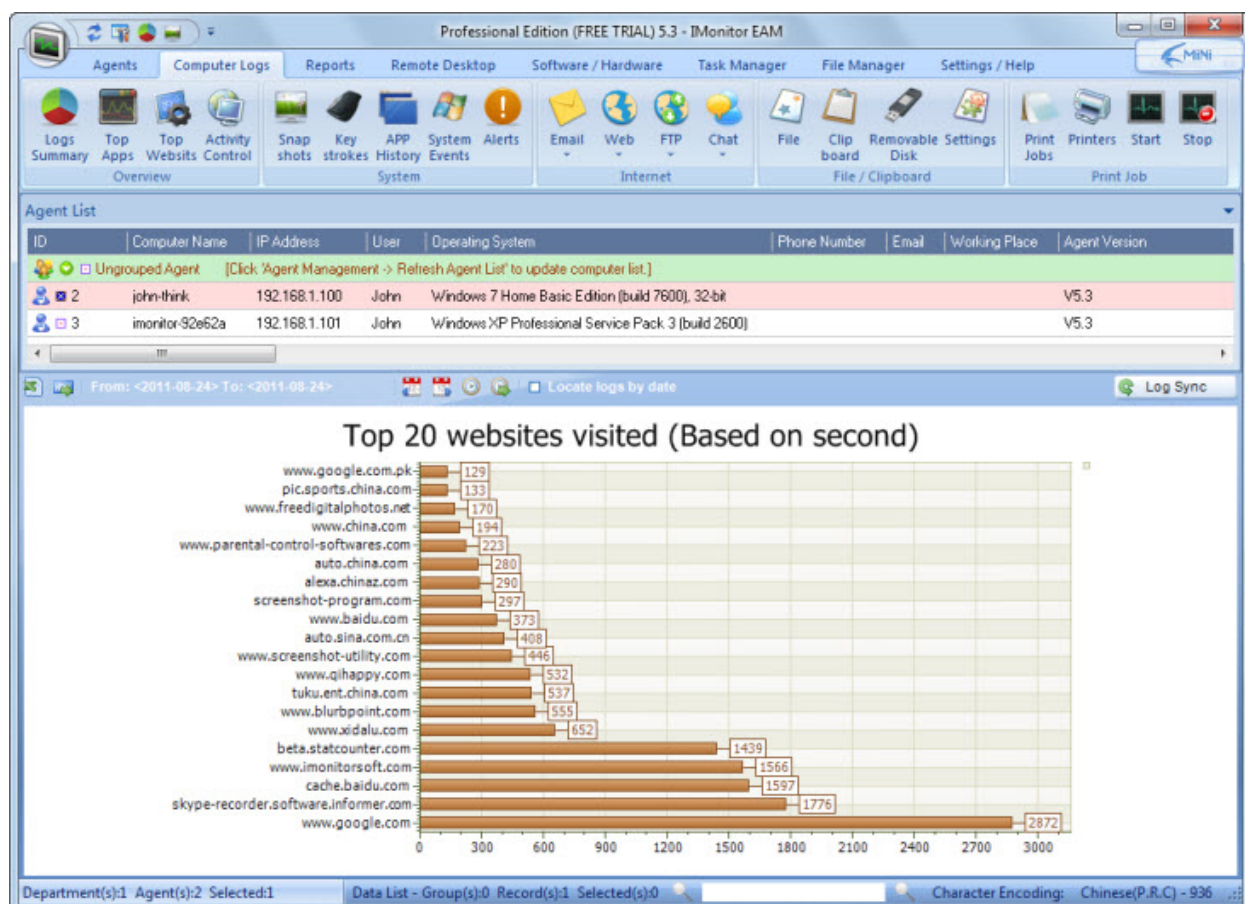

Powerful

Powerful search capabilities are provided that allow you to sift through voluminous data to locate a specific word or string.

Information Accessibility

There are more than 60 built-in charts and reports that can be generated quickly on demand.
