

IMonitor Software

About IMonitorSoft

Since the year of 2002, coming with EAM Security Series born, IMonitor Security Company stepped into the field of security softwares. After improving EAM Products and adopting customers useful suggestions.

IMonitor Security Company has been from being nobody to well known in this field, for now IMonitor Security Company has developed three series of products, business, home and remote. And according to the difference of three series, IMonitor Security Company also divided into three research and support teams. More professional and qualified customers service, all that is IMonitor Security Company chasing for.

IMonitor EAM - Centralized employee monitoring solution

IMonitor EAM Monitoring Survey

96% Nearly ALL of the companies surveyed confirmed their suspicions of **INTERNET ABUSE**, lost productivity, and **compliance violations**.

90% of respondents found employees spending work hours **surfing** the Internet for personal reasons.

89% of all companies surveyed found as much or **MORE ABUSE** than expected, and 28% found “far more” abuse.

84% of companies surveyed found Imonitor EAM monitoring to be as valuable, or **MORE VALUABLE**, than filtering.

Do you have **questions** like?

Which employees are spending the most time surfing web sites?

How much time employees spent on each application?

Who is spending time on shopping sites, sports sites or adult sites?

Which employees chat or use anonymous email services like Hotmail and Yahoo mail?

Who is sending the most emails with attachments?

Which employees may be leaking company confidential information via removable media like flash drives, CDs and DVDs?

Which employees are printing sensitive documents?

Who is arriving to work late and leaving early? Who takes long lunch breaks?

What are my employees searching for on Google, Yahoo and MSN?

With IMonitor EAM you will see

IMonitor EAM Benefits

Technical Benefits:

Complete Internet & PC Monitoring

Every facet of PC usage is monitored and recorded at the workstation level providing you with valuable information about how your office PCs are being used.

Centralized Management

All collected PC activity logs are transferred to a centralized depository (called the Data Vault) allowing for quick access, backup and review by the IMonitor EAM Dashboard application.

Scalable Architecture

The flexible architecture of IMonitor EAM allows your monitoring and surveillance capabilities to expand as your company grows.

Rapid Deployment

Remote deployment tools make installation, configuration and ongoing data collection easy.

Data Security & Integrity

With multi-level user accounts, optional file encryption for Email Attachments and Snapshot files, and a centralized database, IMonitor EAM offers multiple layers of security for your recorded data.

Transparent

The client recorder installs in seconds and operates in "stealth mode" so your employees are unaware that they are being monitored.

IMonitor EAM Benefits

End User Benefits:

Intuitive & Easy to Use

The IMonitor EAM Dashboard, with its feature rich User Interface and built-in Wizards, offers both a "High Level View" and "Detailed View" of how your employees use the Internet and Computer Resources.

Feature Depth

IMonitor EAM provides you with numerous tools and capabilities, making it the most powerful Employee Monitoring package on the market.

Customizable

You can create customized charts and reports to address the specific needs of your organization.

Powerful

Powerful search capabilities are provided that allow you to sift through voluminous data to locate a specific word or string.

Information Accessibility

There are more than 60 built-in charts and reports that can be generated quickly on demand.

IMonitor EAM Pro Price List

Purchase IMonitor EAM Professional Edition

IMonitor EAM is the best employee monitoring software for business. After you pay you will instantly receive your registration code and full version download link. Delivery is performed via email.

You need a separate license for each computer you want to monitor in your company. Please choose the right license below. License agreement allows installing a monitoring module (Monitor) on several computers. This allows several managers to have Employee Activity Monitor installed to track computers in their respective departments.

Base License	Price(USD)	Order Link
5 computers license - License to monitor up to 5 remote computers	\$499.95	Buy Now
